Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 36-57, 75, 79, 80 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 36 recites "wherein upon application of a pressure differential between said first and second surfaces of said flexible contactor, said flexible contactor flexes, creating electrical connections between ones of said first plurality of terminals on said contactor and ones of a second plurality of terminals on said electronic device through ones of said first plurality and second plurality of contact elements."

Neither Specification, nor drawings provide an information how said flexible contactor operating under pressure differential between its first and second surfaces operates in combination with the interposer having resilient contact elements.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2833

Claims 58, 76-78 and 80, 81 are rejected under 35 U.S.C. 102(e) as being anticipated by Parrish.

With regard to claims 58, 76-78, 80, 81 Parrish (US Pat. No. 6,215,320) discloses an assembly comprising:

a contactor (30);

an interposer substrate (36) having first and second opposite sides with a first set of resilient contact elements on the first side and the second set of resilient contact elements

a base (28) supporting the semiconductor device (26) comprising a wafer

means (34) for securing said interposer with respect to said contactor such that at least one of said contactor or said interposer is moveable between a first position and a second position.

wherein in said first position, said first plurality of contact elements do not contact said first terminals on said contactor. And in said second position, said first plurality of contact elements contact said first terminals on said contactor and said first plurality of contact elements and said second plurality of contact elements provide electrical connections from said first terminals on said contactor to a second plurality of terminals on said electronic device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

With regard to claims 60-74, Parrish when modified respectively by Eldridge et al (US Pat. No. 5,974,662), Eldridge et al (US Pat. No. 6,184,053), Khandros et al (US Pat. No. 6,064,213) Brozowski et

Art Unit: 2833

al (Electronic Packaging & Interconnection Handbook, McGraw-Hill, 1997, Ch. 8) disclose all of the limitations as respectively presented in the rejection filed 10/17/2003.

Response to Arguments

Applicant's arguments with respect to claims 36, 58 have been considered but are moot in view of the new ground(s) of rejection.
